

Sweeps Workshop

Python tasks

1. Answer the following questions:

- How are VPAC and TOMSERVO related?
- How are the datasweep-index-‘objtype’.fits files related to the sweeps?
- How do you retrieve photometry for an object using sweep_data_index.py?

2. Complete #7 from Monday’s tasks.

- Plot the RA,dec values for the first 100 FIRST objects.
 - Overplot the SDSS RA,dec values that match these FIRST sources within 2”.
-
